

# Atglen Borough Streetscape Improvements

Atglen Borough, Chester County, Pennsylvania

## Project Description:

As part of providing continued municipal engineering services to Atglen Borough, ELA Group initially facilitated the planning process (through the Strategic Plan process) that identified the Main Street corridor as a vital historical, residential and commercial area of Atglen Borough. Thereafter, the project to revitalize and improve the Main Street corridor was undertaken by Borough Council.

ELA Group then commenced work on the project which entailed various beautification and functional improvements to six blocks of Main Street (through the downtown area), removing overhead utility lines and relocating them underground, creating a small park/open space area, and a “gateway” into the community. Additionally, ELA coordinated with the affected utility companies, negotiated with affected property owners regarding service charges (pre-existing v. underground), and overseeing the construction activities. Cost of the project was \$890,000 for improvement with an additional \$500,000 for utility relocation.
