

Bellefonte Area High School

Bellefonte Borough, Centre County, Pennsylvania

Project Description:

Improvements to the Bellefonte Area High School included a two-story classroom addition, two additions to the auditorium, a new gymnasium, reorientation of the main entrance to include an entry courtyard, separation of bus traffic and passenger traffic through the creation of a student drop-off area and a bus drop-off area. The project also entailed completely renovating the site to include a new parking lot and redesigned parking areas to address drainage, lighting and landscaping.

ELA provided a full range of services, including stormwater management analysis, report and system design; detailing of roadway access and sidewalk/stair systems; utility layout and location; and adjacent property owner coordination. Traffic impact and analysis was a key component of the land development approval process. ELA provided support and coordination with the School District, Borough and PennDOT. ELA provided a full set of construction drawings and project specifications for construction and provided construction observation for aspects of the site design implementation.
