Services Provided:

ELA Group, Inc. provides design and engineering services for a variety of retaining wall types for various situations and locations. Wall types include segmental unit, concrete masonry unit and cast-in-place concrete. Our services begin with initial consultation and site analysis then moves to the design and engineering. Our staff can provide construction administration and observation services as requested.

Our design projects range from smaller landscape walls to large structural retaining walls of 30 plus feet. Numerous segmental unit wall manufacturers have selected ELA Group, Inc. as their design engineering firm.
